Description

Registered user Robert Hammond claims that several cases that were linked to his registered user account in January were unlinked from his account in February. When checking these cases, they now say that they were created as a public user using Mr. Hammonds email, perseverance2013@ [Ex. 6] However, we want to associate all of the cases that Mr. Hammond is missing to his Registered User account. The spreadsheet for which cases will be link. The cases highlighted in YELLOW are the missing cases.

Comments

Comment by Mohammad Shaikh [28/Mar/23]

This email address perseverance2013@ [Ex. 6] is found to be associated with multiple (83) profiles, 226 requests associated with one (non-guest) profile and remaining are unique profiles created at different times per request (75).

Attached is the shell script and the request data to be fixed.

Comment by James Horner [28/Mar/23]

add query parameter where=(assocType='foia:requester') will bring back just the requester for the case

```
https://alfresco.foiaonline.xyz/alfresco/api/-default-/public/alfresco/versions/1/nodes/2ed0e070-c6c7-4d8b-878d-a91ad0d3c2ae/targets?where=
(assocType%3D'foia%3Arequester')
```

This will give you the UUID of the current requester for a case 2ed0e070-c6c7-4d8b-878d-a91ad0d3c2ae

```
curl --request GET --basic --user 'admin:admin' --no-progress-meter --header 'Content-Type: application/json' --header 'Accept: application/json'
"https://alfresco.foiaonline.xyz/alfresco/api/-default-/public/alfresco/versions/1/nodes/2ed0e070-c6c7-4d8b-878d-a91ad0d3c2ae/targets?where=
(assocType%3D'foia%3Arequester')" | jq -r -e '.list.entries[0] | .entry.id'
```
